

Application Transformation Plan

AppScore Demo
Mar 4, 2021 11:06 AM

This document is a sample Application Transformation Plan from the AppScore platform. These documents can be generated in Word or PDF format at any time from the system. It is intended as a template cloud adoption plan that can be tailored to the business objectives. As move groups, dates or costs change in the platform the document can be quickly re-generated with the up-to-date information.

AppScore Application Transformation Plan

Introduction

[Note to customer: Add details here of the transformation programme. Include details on aims and objectives, scope, timelines etc.]

This report provides a summary of the AppScore assessment for the Move Group 1, Move Group 2, and Move Group 3 move groups, covering 19 applications comprising 173 servers across 3 datacenters. Transformation is estimated to take 122 days costing £266,730 (average cost of £14,038 per application), and is planned to start on 25 Feb 2021 and complete on 16 Aug 2021.

The applications were assessed by the AppScore platform bringing together business, application and technical data. Each application has been scored for Risk and Complexity in its current environment. An assessment against the 7Rs model was made to determine the possible migration or transformation routes to cloud. Each of the options identified as suitable has been scored for Risk, Complexity and Benefit of transformation.
