

# Application Transformation Plan

AppScore Demo  
Oct 22, 2021 10:53 AM

# Introduction

**Note to customer: Add details here of the transformation programme. Include details on aims and objectives, scope, timelines etc.**

This report provides a summary of the AppScore assessment for the Move group 1, Move group 2, and Move group 3 move groups, covering 10 applications comprising 71 servers across 3 datacenters. Transformation is estimated to take 81 days costing £100,224.63 (average cost of £10,022 per application), and is planned to start on 19 Apr 2021 and complete on 10 Aug 2021.

The applications were assessed by the AppScore platform bringing together business, application and technical data. Each application has been scored for Risk and Complexity in its current environment. An assessment against the 7Rs model was made to determine the possible migration or transformation routes to cloud. Each of the options identified as suitable has been scored for Risk, Complexity and Benefit of transformation.

# Overall Summary
